The HKICPA has issued a number of new and revised Hong Kong Financial Reporting Standards (“HKFRSs”) and interpretations that are first effective or available for early adoption for the current accounting period of the Company. The adoption of these new and revised HKFRSs has no material effect on the Interim Financial Statements, and there have otherwise been no significant changes to the accounting policies applied in these financial statements.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

Compared with the corresponding period of the last year, the increase in the net profit was mainly caused by an increase in the revenue that included net realized and unrealized gain on financial assets at fair value through profit or loss of approximately HK\$11.27 million.

There was no new investment plan since January 2017.

Prospects

While global economic performance has improved since the start of 2017, we remain cautious of possible risks of decline due to uneven economic growth and geopolitical tensions.

In the US, further recovery of the economy is likely to follow as its fiscal policy becomes more expansionary. At the same time, this is balanced by uncertainties about the impact of financial legislations to be proposed, as well as potential protectionist measures bringing pressure to certain emerging markets and low-income countries.

In the EU, the Brexit has resulted in political instability and increasing uncertainty about the EU's prospects. The overall impact on the European economy will likely be felt for a long time in the markets.

As for China, the Central Government is expected to continue to offer policy support to drive the development of an affluent society. In addition to the Belt and Road initiative, the Asian Infrastructure Investment Bank has also commenced operation to provide a new driving force for global economies.

According to the latest "World Economic Outlook Update" published by IMF, global economic activity could accelerate more robustly if the policy stimulus adopted by the US or China in 2017 is stronger than currently projected. The IMF estimated global growth at 3.1% for 2016, rising to 3.4% for 2017 and 3.6% for 2018.

With the above in mind, we will continue to seek out investment opportunities with long-term prospects to enrich our investment portfolio. As always, we will maintain our pragmatic approach to maximize returns to shareholders while minimizing losses.
